

Quarterly Pest Control

4 Step protection against pests every 90 days, *Guaranteed.*

Our Quarterly Pest Control service is the answer to affordable yet effective protection against pests. We start by placing a long lasting granular barrier next to the foundation of your home. Next, using a microencapsulated insecticide - we treat the perimeter surface, cracks and other places where bugs can get in. We complete the protection by treating weep holes, vents and other pest entry points. This service is guaranteed to keep cockroaches, spiders, centipedes, scorpions, house ants, and most common* pests out. Cobweb removal from eaves can also be included*. If indoor service is necessary, we'll inspect and treat as needed or requested. It's the best non-intrusive pest service available, *and your satisfaction is fully Guaranteed!*
